Royal® Building Products Introduces Enhanced Royal Uniflex™ Garage Door Thermo Stop® at 2017 IDAExpo *Royal Uniflex offers greater design and adhesion*

WOODBRIIDGE, ONTARIO (04/19/17) — Royal® Building Products, a Westlake company, introduces its enhanced Royal Uniflex™ Garage Door Thermo Stop® at the 2017 IDAExpo. Featuring a new patent-pending design and restored adhesion, Royal Uniflex offers greater product performance and installation options while reducing past flex distortion obstacles.

Royal's Uniflex Garage Door Thermo Stop now features a new flex mount design that accommodates both top and side mount applications. In addition, the flex adhesion of the product has been increased by 75 percent, which allows for less waste during the installation process. Improved uniformity during packaging and storage also allows for reduced flex distortion issues. Available in a Standard 2-inch, Retro 2-5/8-inch and Architectural 3-1/4-inch.
