

Royal Launches Distribution of Exterior Portfolio's Solid CoReSiding® in Canada

Woodbridge, Ontario (May 5, 2011) – Royal Building Products, today announced that it is now distributing Solid CoReSiding® in the T6, D7 and Board & Batten profiles at its company-owned Boncor Building Products stores throughout Canada and its Residential Building Products stores in Quebec.

In February, Royal's parent company – Georgia Gulf Corporation (NYSE: GGC) – acquired Ohio-based Exterior Portfolio from Crane Group.

"This is an exciting new offering for Royal Building Products because it gives our Canadian customers widespread access to one of the industry's premier line of insulated vinyl siding," said Adrien Pilon, general manager of distribution. "Exterior Portfolio is the market leader for insulated siding in North America."

In addition to offering homeowners and builders an aesthetically appealing look and feel, insulated siding – with its Smart**CORE** insulation and TXL™ Lamination Technology – provides significant performance advantages over other brands including:

- moisture management ridges that provide space for ventilation, allow condensation to escape and enhances insulation value without contributing to mold
- 53% higher flexural strength for smoother, straighter walls
- 64% greater compression strength, resulting in enhanced impact resistance
- 40% higher tensile strength
- 200% more bond strength, providing greater surface adhesion between panel and foam

About Royal Group
