Shutters, Mounts & Vents

Finish your masterpiece.

Feel free to call them new beginnings.

How durable, strong and well-engineered do you like your shutters, mounts and vents? We hope "very" because we set the bar very high. Practically speaking, our shutters frame windows, our mounts house and secure lights and our vents air out homes. But so do everybody else's.

Today's contractor clients want more than function. They expect the details that finish their home to live up to the siding, moulding and trim that surround them. Royal® shutters, mounts and vents have the unique features to make them easier for contractors to install and homeowners to live with.

Meterbase Mount
Large mounting surface takes on oversized items.

Gable Vents
Ventilates the attic, keeps water out and lets air flow in.

b-Vent and d-Vent Exhaust Vents
Elegantly airs out bathroom and dryer interiors.

Recessed Split Mount
Flawlessly frames faucets and receptacles, and provides a tight seal.

Electrical Mounts
Code-approved mounting block easily handles light fixtures and electrical receptacles.

Shutters
One-piece, wood grain design builds on the charm.

Shutters

So what's behind shutters that look this good for so long?

Royal Exterior Shutters look great, wear long and do an uncanny impersonation of wood. What they don't impersonate is falling apart in the face of persistent sun, weather, years and family life. It all starts with how they're constructed.

Our shutters do more than look pretty:

Built Strong: They're designed as one piece and built heavier than industry standards—so they feel as substantial as wood and last longer.

Look New For Years: Their built-in UV protection plus our unique color-through process makes for rich, vibrant color that resists fading and scratching, and looks new for years.

Show Off And Maintain: While they have the great looks and texture of natural wood, they require no painting, scraping or staining.

Mix Well With Others: Their huge selection of sizes and colors ensures they match virtually every home style.

Install Themselves: They're a no-brainer to install because they come packaged with both screws and caps that work on any surface.

Raised Panel

12" Louvered Panel

14" Louvered Panel

12-3/8" Three Board Open Panel

14-1/2" Four Board Closed Panel

Form and function go together like home and improvement.

A beautiful home doesn't end with shutters and siding. Finish the job with mounts and vents created with the same love to form a long-lasting marriage of form and function. Our industry-leading design and unique features complement each other like job and well done.

Built Versatile: Patented internal snap lock system means mounts* and vents install easily on traditional vinyl, insulated siding and fiber cement siding. Multiple snapping positions simplify installation on standard vinyl and insulated siding.

Show Clean: Each one of our vents is individually poly-bagged to keep out dirt and debris while on the shelf, so the product gets to the job site in the color and condition originally intended.

Color Coordinated: All mounts and vents are engineered to match all major siding manufacturers.

Look Finished: One-piece designs (no trim ring assembly) achieve a completely finished look and let you begin installation even before you have the correct color in stock.

Easy To Order And Priced Fairly: Prices are competitive plus there's no upcharge to order one unit at a time.

* Except for electrical mounts.

Electrical Mounts

Don't sweat the light fixtures or electrical outlets on homes with vinyl or insulated siding. Our electrical mounts are easy to install and match most color palettes. Be working best with construction or remodeling projects, our electrical mounts:

Working best with construction or remodeling projects, our electrical mounts:

Install Right The First Time: Built-in, code-approved mounting block ensures correct installation of light fixtures and electrical receptacles.

Work Safely: Keep wires safely hidden to protect the home while achieving a clean, finished look.

Weatherproof: Electrical box is pre-installed, self-contained and airtight to seal wiring from the elements.

Light Fixture

Placing clearance holes under fixture screws eliminates binding of screws.

Bracket mounting holes**

Light fixture comes supplied with light fixture bracket.

Electrical Receptacle

Mounting holes for receptacle.**

e-Mount body is deep enough to allow for GFI receptacle.

** No special screws required. Simply use screws supplied with light fixture.

Standard Mounts

Three words for the roughest weather and the hottest sun: Bring it on.

Our mounts for faucets, electrical meters, house numbers and other items are just as durable, strong and maintenance free as our electrical mounts. They're UV protected, so their color is here to stay. Plus they require zero painting or staining, so the homeowner's weekends don't waste away.

Royal's mounts are designed for:

Wide Selection: Accommodate all kinds of applications on a variety of new construction and remodeling projects.

No-Fuss Installing: Engineered to install easily on vinyl, insulated and fiber cement siding.

Easy Color Matching: Our mounts come in lots of colors, so they have a match waiting among most manufacturers' siding.

Fade Resistance: Thanks to our color-through process, fading and scratches don't exist.

Coach Cover

Installs easily over the electrical mount to increase the mounting surface for large coach light fixtures.

Standard Mount

Provides a level, water-resistant mounting surface for all exterior accessories.

Large Standard Mount

The right choice for larger accessories, address numbers and other items that need a bigger mounting area.

Meterbase Mount

Provides the largest mounting surface for meterbases, hose reels and other large utility items. Use the offset flange to stack meterbases next to each other for gang meters.

Mini Mount

Comes up big when mounting smaller items like doorbell buttons.

Recessed Mini Mount

The convenient cutout lets you mount receptacles effortlessly.

Recessed Split Mount

Fits easily around existing water faucets and receptacles, and creates a nice seal with a clean, attractive finish. Larger than industry standard so there's more room to turn the faucet handle.

Recessed Cover

Fits easily over the recessed split mount. Push snap protects faucets from winter elements.

Flush Mount

Ideal for mounting lamps and other types of exterior accessories after siding has been installed. Fits easily over double 4" and double 5" siding.

We make practicality and energy efficiency a beautiful thing.

Help homeowners know and control which way the wind blows with Royal's utility and gable vents. Durable, water resistant and easy to install, tons of styles and colors make our vents a perfect match for any "finishing touch" project.

Utility Vents

b-Vent / Exhaust Vent

- Low-profile exhaust vent
- Built-in grids to keep birds and rodents out
- Cover snaps on and off easily for quick installations and maintenance*
- Available with or without 4" aluminum tube

Intake/Exhaust Vent

- Idea design for soffit ventilation
- Cover snaps on and off easily for quick installations and maintenance*
- Kit comes with 4" aluminum tube and 4" to 3" Reducer

d-Vent / Exhaust Vent

- Unique paddle wheel design prevents birds and rodents from entering vent while air is being exhausted
- Inner flap is recessed into base when dryer is turned off, further preventing bird and rodent entry
- Cover snaps on and off easily for quick installation and lint removal*

You'll find our vents:

Easy To Install: Fits easily with vinyl, insulated and fiber cement siding

Very Colorful: Available in enough colors to match most any siding options

Colorfully Durable: Our color-through process makes long-time good looks the new standard

Maintenance Free: Fading, peeling or chipping is not an option with this design

Gable Vents

Make flimsy trim rings and screens history. Royal Gable Vents are designed to keep temperature control and attic ventilation top of mind.

Octagon

Round

Square

Vertical

Half Round

Round Top

Baffle System

Unique design for attic space keeps water out and free-flowing air circulating.

Screen System

Tough molded in-screen system will not tear like conventional screens, so bugs and birds can't damage it. Includes a drain hole for water to flow.

Water Drainage

Ramp system diverts water back out and down to drain, keeping it away from the vent system.

Easy Installation

Includes nearly 2" of channel to simplify siding installations and look like one unified piece.

* Like all bathroom/dryer vents, periodically inspect and clean for optimum performance.
