

More Beauty. Less Waste.

Amazing Accents with Less Waste, Less Work

Beautiful, undeniable curb appeal is defined by amazing accents and warm, charming character. From rustic to refined, coastal to craftsmen, the right exterior details simply take a home to the next level. Its character can be expressed in a multitude of ways, including color, texture and styles that include Cedar, Classic Coastal, Hand-Split Shake and Half Round.

Portsmouth™ Shake & Shingles Siding is rich with everything you could wish for in a main or accent siding with a wide range of solid colors, along with innovative Weathered and Woodland colors. Engineered with deep textures and low maintenance features, Portsmouth Shake and Shingles siding never need painting and are manufactured to withstand all weather elements.

Beautiful Styles for Your Project

Choose from beautiful styles like the .single course 7" Shake, double course 5" shingle, half round Shingle. and the single course 9" hand split shake design that features realistic subtle gaps between the courses similar to cedar shake. The single course shake offers a subtle gap between the courses just like real cedar shake

Many of these can be obtained in a range of solid colors which match our traditional siding colors as well as several offering our beautiful Weathered and Woodland colors. Weathered colors emulate the look of aged cedar shake, while Woodland colors match the beauty of stained cedar shake that emphasize the woodgrain texture. And all are delivered without the ongoing maintenance of cedar.

Why Portsmouth?

Broad array of traditional colors and trending, UV-resistant Smart Styles™ shades

Profiles designed to **withstand hurricane-force winds** up to 200 mph

Utilizes a UV-stabilized polymer for **strong fade protection**

Never needs painting

Won't warp, buckle or sag

Limited Lifetime Warranty

Well-Engineered Shake with Less Waste

Beyond the beauty, the Portsmouth Shake line is also designed for a quick and efficient installation. Manufactured at longer lengths than competitive offerings, Portsmouth Shake delivers more wall coverage for every piece installed.

Gable roof applications are a popular choice for shake to help add curb appeal. However, installation of shake in a gable roof area can present unique challenges for contractors. The geometry of a gable roof means each angled cut results in significantly more wasted materials when using typical wider, multi-course products. Portsmouth single course shake is the ultimate solution for reducing waste when used in a gable application. Beauty combined with well-engineered features are what make Portsmouth shake offerings an amazing choice. Or in other words, Waste Not, Want It.
